

# Hasan AlKhateb

## WORK EXPERIENCE

### **Lucidly.**

### **Frontend Developer / Team Lead**

UAE, Dubai (Remote)

OCT 2023 – JUN 2026

- Led the Front-End development team, providing technical guidance, code reviews, and mentoring to team members.
- Collaborated with stakeholders to analyze business requirements and translate them into scalable technical solutions.
- Collaborated with Backend and AI teams to define API contracts, data structures, and feature implementation strategies.
- Migrated legacy Webpack build pipelines to Vite, reducing local development server start times by 80% and speeding up CI/CD build deployment pipelines.
- Designed scalable frontend architectures and established development standards and best practices.
- Led technical discussions, feature planning sessions, and architectural decision-making across multiple teams.
- Optimized application performance, investigated and resolved complex production issues, and ensured the stability and reliability of enterprise applications.
- Conducted technical assessments and interviews, helping to recruit and onboard high-quality frontend developers aligned with team culture and project needs.

### **Shahin Resort.**

### **Full-Stack Developer**

Syria, Tartous (Onsite)

JAN 2023 – SEP 2023

- Assisted in architecting and piloting an IoT electricity-management platform that combined Raspberry Pi controllers with RFID access control; the prototype delivered verified 20 % energy savings.
- Created a Bash automation script for programming 400+ industrial controllers, cutting manual setup time by 75% and boosting deployment efficiency.
- Resolved high-priority UI issues and optimized frontend performance using JavaScript and CSS, resulting in smoother user interactions.
- Helped in engineering custom circuits and Raspberry Pi integrations to automate resort infrastructure, streamlining operations and reducing manual intervention.

### **Nimans.**

### **Frontend Developer**

Lebanon (Remote)

APR 2022 – DEC 2022

- Implemented UI components and data visualization features in a React-based microservice platform for monitoring Cisco collaboration systems, improving usability for end users.
- Diagnosed and resolved frontend bugs while developing custom pages using React and TypeScript, meeting dynamic client requests within tight deadlines.

## TECHNOLOGIES

### **Core & Languages:**

TypeScript, JavaScript (ES6+), HTML5, CSS3.

### **Frameworks & Libraries:**

React.js, Next.js, React Native, Tailwind CSS.

### **State Management & Data:**

Zustand, React Query (TanStack), Context API, Jotai, REST APIs.

### **Build Tools & Workflow:**

Vite, Webpack, Git, CI/CD, npm.

### **Testing:**

Vitest (Unit Testing).

## LANGUAGES

**Arabic** native

**English** C1.
